

# USL SHEFFIELD

## 2 X DESIGN ENGINEERS

The **USL Group of companies** are market leaders in the provision of **specialist civil engineering and construction solutions** for virtually any type of new build or refurbishment project. For almost four decades, the business has been at the **forefront of cutting-edge resin and cementitious technology**, combining high performing innovative products, first class operations, expert technical support, and unrivalled customer service. **USL Group** specialise in **expansion joints, structural and liquid waterproofing, construction chemicals, concrete repair systems, injection resins and specialist safety & anti-slip products**. With a comprehensive portfolio of products and a highly developed global network, the business is focussed on providing specialist construction solutions on a truly global basis. We are currently in the process of building a brand-new facility at Junction 36 in Sheffield.

At our site in Sheffield, we are looking for **two** ambitious and motivated engineers to join our **Design Department**. Reporting to the Senior Design Engineer, these are excellent opportunities for high calibre individuals to collaborate with our team of experienced professionals and engineers in a dynamic environment.

As a successful candidate you will need to display the desire, drive, and determination to perform as part of a team. You will be given responsibility requiring you to organise your workload and be proactive. **Full training and mentoring will be provided**. This is an excellent opportunity to gain exceptional experience, which is attractive to any career-minded engineer.

### Main Activities/Responsibilities:

1. Design structural bearings through the various stages of design from calculations to 3D modelling, FEA, formal submission, manufacturing drawings and installation
2. Creation and compilation of project specific documentation, and manufacturing drawings once approval is received
3. Apply techniques such as design for manufacture, design for assembly and installation and concurrent engineering
4. Prepare general arrangement drawings and produce detailed drawings for manufacture
5. Provide support for the design's life cycle (Product Lifecycle Management) from concept through to installation and service
6. Provide support to customers (internal and external) around the rapid evaluation of problems, & specialist advice with the preparation & presentation of solutions

### Ideally you will have:

- Approximately 1-3 years' relevant experience and ideally working toward Chartered status
- Solid technical background in Structural/Mechanical engineering
- Proven experience of, and can demonstrate excellent interpretation of complex engineering drawings
- A general understanding of bridge/construction industry/bridge bearings, expansion joints
- Experience of working with multiple discipline projects within a challenging multi-site engineering environment
- Highly experienced in working under own initiative, demonstrating an ability to set & meet personal targets, combined with the flexibility to adjust to workload priorities to take account of new deadlines.
- Interpersonal and communication skills and a commitment to customer service; ability to build and maintain good working relationships with colleagues, clients, and sub-contractors
- IT knowledge, including Microsoft 365 Suite: Outlook, Word, Excel, PowerPoint, ERP and/or MRP systems, CRM, AutoCAD/SolidWorks, and industry-specific software
- A flexible, forward-thinking approach to work, along with the ability to work as part of a team.

### Our fantastic package includes:

- Support and funding for Chartered status
- Car Allowance
- Private Healthcare Plan
- 8% non-contributory pension scheme
- Bonus Scheme
- 23 days holiday per annum
- Digital Suggestion Box, Employees of the Month Scheme (win a £200 Amazon voucher!), secure free parking, wellbeing & charity initiatives, CPD Forum
